

AUSTRALIAN CAPITAL TERRITORY  
MOTOR VEHICLES (DIMENSIONS AND MASS) ACT 1990

DETERMINATION  
No. 86 of 1990

Under Section 57(2) of the Motor Vehicles (Dimensions and Mass) Act 1990, I DETERMINE that for the purposes of section 24(2)(c) of the Act the gross mass in tonnes for each class of combination of vehicles "D" is  $3L + 8$ , where L equals the overall axle spacing in metres and provided that the gross mass of a trailer (other than a semi-trailer) does not exceed the gross mass of the motor vehicle and provided that the maximum gross mass permitted shall not exceed 42.5 tonnes.

For the purposes of this Determination "overall axle spacing" means, in the case of a motor vehicle to which a trailer or semi-trailer is attached, the distance between the centre line of the most forward axle or, if the most forward axle forms part of a twin steer axle group, the forward axle of that group of the motor vehicle to the centre line of the most rearward axle or, if the most rearward axle forms part of an axle group, the most rearward axle of that axle group of the trailer or semi-trailer, being that distance measured while the centre line of the centre of the most forward axle or twin steer axle of the motor vehicle is parallel to the centre line of the most rearward axle or most rearward axle of the rear axle group of the trailer or semi-trailer.

Date: 24 DEC 1990
