9. Dictionary

In this instrument:

Contaminated remediation material means soil that has been approved for acceptance by the Environment Protection Authority and that is contaminated with small amounts of bonded asbestos sheeting, or soil contaminated with small amounts of other contaminants.

Beneficial re-use remediation material means material such as clay, gravel, sand, soil, and rock that has been approved for acceptance by the Environmental Protection Authority and that has been extracted from areas that are contaminated or have been previously contaminated.

WBRMC means the West Belconnen Resource Management Centre.

virgin excavation natural material means: material (eg. clay, gravel, sand, soil and rock) that is not mixed with any other waste and that:

- (a) has been excavated from areas that are not contaminated, as a result of industrial, commercial, mining or agricultural activities, with manufactured chemicals and that does not contain sulphidic ores or soils; or
- (b) consists of excavated natural materials that are approved by the Environment Protection Authority for disposal as virgin excavated natural material.
