

Australian Capital Territory

Radiation Regulation 2002 (repealed)

SL2002-1

made under the

Radiation Act 1983

Republication No 3

Effective: 1 July 2007

Republication date: 1 July 2007

As repealed by A2006-33 s 127 (2)

Authorised by the ACT Parliamentary Counsel

About this republication

The republished law

This is a republication of the *Radiation Regulation 2002* (repealed), made under the *Radiation Act 1983*, including any amendment made under the *Legislation Act 2001*, part 11.3 (Editorial changes). It also includes any commencement, amendment, repeal or expiry affecting the republished law to 1 July 2007.

The legislation history and amendment history of the republished law are set out in endnotes 3 and 4.

Kinds of republications

The Parliamentary Counsel's Office prepares 2 kinds of republications of ACT laws (see the ACT legislation register at www.legislation.act.gov.au):

- authorised republications to which the *Legislation Act 2001* applies
- unauthorised republications.

The status of this republication appears on the bottom of each page.

Editorial changes

The *Legislation Act 2001*, part 11.3 authorises the Parliamentary Counsel to make editorial amendments and other changes of a formal nature when preparing a law for republication. Editorial changes do not change the effect of the law, but have effect as if they had been made by an Act commencing on the republication date (see *Legislation Act 2001*, s 115 and s 117). The changes are made if the Parliamentary Counsel considers they are desirable to bring the law into line, or more closely into line, with current legislative drafting practice.

This republication does not include amendments made under part 11.3 (see endnote 1).

Uncommenced provisions and amendments

If a provision of the republished law has not commenced or is affected by an uncommenced amendment, the symbol **U** appears immediately before the provision heading. The text of the uncommenced provision or amendment appears only in the last endnote.

Modifications

If a provision of the republished law is affected by a current modification, the symbol **M** appears immediately before the provision heading. The text of the modifying provision appears in the endnotes. For the legal status of modifications, see *Legislation Act 2001*, section 95.

Penalties

The value of a penalty unit for an offence against this republished law at the republication date is—

- (a) if the person charged is an individual—\$100; or
- (b) if the person charged is a corporation—\$500.

Australian Capital Territory

Radiation Regulation 2002 (repealed)

made under the

Radiation Act 1983

Part 1 Preliminary

1 Name of regulation

This regulation is the *Radiation Regulation 2002*.

3 Dictionary

The dictionary at the end of this regulation is part of this regulation.

Note 1 The dictionary at the end of this regulation defines certain terms used in this regulation.

Note 2 A definition in the dictionary applies to the entire regulation unless the definition, or another provision of the regulation, provides otherwise or the contrary intention otherwise appears (see Legislation Act, s 155 and s 156 (1)).

4 Notes

A note included in this regulation is explanatory and is not part of this regulation.

Note See the Legislation Act, s 127 (1), (4) and (5) for the legal status of notes.

Part 2 Dose limits

5 **Meaning of *effective dose* for s 6**

- (1) For section 6, a person's effective dose for a relevant period is the total of—
 - (a) the effective doses that the person receives, from external exposure, during the relevant period; and
 - (b) the person's committed effective dose, received from intakes during the relevant period, for the next 50 years.
- (2) However, if the person is under 18 years old, the committed effective dose must be worked out on the basis of the number of years calculated by subtracting the person's age, at the time of the calculation, from 70.
- (3) In this section:
relevant period means—
 - (a) for a person subject only to public exposure—1 year; or
 - (b) for a person subject to occupational exposure—5 years.

6 **Effective dose limits**

- (1) The effective dose limit for occupational exposure is 20mSv in a year, averaged over 5 consecutive years.
- (2) However, the effective dose for a person subject to occupational exposure must not, in a year, be more than 50mSv.
- (3) The effective dose limit for public exposure is 1mSv in a year.
- (4) The effective dose limit for an unborn child is 1mSv in a year.

Note An employee who becomes pregnant should advise her employer as soon as practicable. Appropriate measures may then be taken to control the employee's exposure, so that doses that may be received by the

foetus (during the remainder of the pregnancy), while the employee is at work, are consistent with s 6 (4): see National standard for limiting occupational exposure to ionising radiation [NOHSC: 1013 (1995)]. The standard was adopted in the ACT as a code of practice under the *Occupational Health and Safety Act 1989*, s 206, commencing on 3 January 1996.

NOHSC means the National Occupational Health and Safety Commission established by the *National Occupational Health and Safety Commission Act 1985* (Cwlth), s 6.

7 Equivalent dose limits

- (1) The equivalent dose limit to the lens of the eye is—
 - (a) for occupational exposure—150mSv in a year; and
 - (b) for public exposure—15mSv in a year.
- (2) The equivalent dose limit to the hands and feet for occupational exposure is 500mSv in a year.
- (3) The equivalent dose limit to the skin is—
 - (a) for occupational exposure—500mSv in a year; and
 - (b) for public exposure—50mSv in a year.
- (4) The equivalent dose limit to the skin applies to the average dose received by any 1cm² of skin.

Dictionary

(see s 3)

Note 1 The Legislation Act contains definitions and other provisions relevant to this Act.

Note 2 For example, the Legislation Act, dict, pt 1 defines the following term:

- year.

Note 3 Terms used in this regulation have the same meaning that they have in the *Radiation Act 1983* (see Legislation Act, s 148.) For example, the following terms are defined in the *Radiation Act 1983*, dict:

- employee
- employer.

committed effective dose means the effective dose that a person is committed to receive from an intake of radioactive material.

Note See the Recommendations for limiting exposure to ionizing radiation (1995) (Guidance note [NOHSC: 3022 (1995)]) (the ***recommendations***), annex B.

The recommendations were developed by an expert committee advising standing committees of both the National Health and Medical Research Council (the ***council***) and the NOHSC. The council adopted the recommendations on 7 June 1995. The NOHSC endorsed the recommendations as a NOHSC guidance note.

excluded exposure means the component of exposure that arises from natural background radiation.

exposure means the circumstances of being exposed to radiation.

external exposure means exposure to radiation from a source outside the human body.

medical exposure means—

- (a) the exposure of a person to radiation received as—
- (i) a patient undergoing medical diagnosis or therapy; or
 - (ii) a volunteer in medical research; or

- (b) non-occupational exposure received as a consequence of assisting an exposed patient.

occupational exposure means exposure of a person to radiation that happens in the course of the person's work and that is not excluded exposure.

public exposure means the exposure of a person to radiation that is not occupational or medical exposure.

Endnotes

1 About the endnotes

Amending and modifying laws are annotated in the legislation history and the amendment history. Current modifications are not included in the republished law but are set out in the endnotes.

Not all editorial amendments made under the *Legislation Act 2001*, part 11.3 are annotated in the amendment history. Full details of any amendments can be obtained from the Parliamentary Counsel's Office.

Uncommenced amending laws and expiries are listed in the legislation history and the amendment history. These details are underlined. Uncommenced provisions and amendments are not included in the republished law but are set out in the last endnote.

If all the provisions of the law have been renumbered, a table of renumbered provisions gives details of previous and current numbering.

The endnotes also include a table of earlier republications.

2 Abbreviation key

am = amended	ord = ordinance
amdt = amendment	orig = original

5 Earlier replications

Some earlier replications were not numbered. The number in column 1 refers to the publication order.

Since 12 September 2001 every authorised republication has been published in electronic pdf format on the ACT legislation register. A selection of authorised replications have also been published in printed format. These replications are marked with an asterisk (*) in column 1. Electronic and printed versions of an authorised republication are identical.

Replication No and date	Effective	Last amendment made by	Replication for
R1 5 Mar 2002	5 Mar 2002– 1 Nov 2004	not amended	new regulation
R2 2 Nov 2004	2 Nov 2004– 30 June 2007	not amended	editorial amendments under Legislation Act
