Water Resources Act 2007

A2007-19

Republication No 26

Effective: 31 May 2024 – 10 July 2024

Republication date: 31 May 2024

Last amendment made by [A2024-21](#)

About this republication

The republished law

This is a republication of the *Water Resources Act 2007* (including any amendment made under the *Legislation Act 2001*, part 11.3 (Editorial changes)) as in force on 31 May 2024. It also includes any commencement, amendment, repeal or expiry affecting this republished law to 31 May 2024.

The legislation history and amendment history of the republished law are set out in endnotes 3 and 4.

Kinds of republications

The Parliamentary Counsel's Office prepares 2 kinds of republications of ACT laws (see the ACT legislation register at www.legislation.act.gov.au):

- authorised republications to which the *Legislation Act 2001* applies
- unauthorised republications.

The status of this republication appears on the bottom of each page.

Editorial changes

The *Legislation Act 2001*, part 11.3 authorises the Parliamentary Counsel to make editorial amendments and other changes of a formal nature when preparing a law for republication. Editorial changes do not change the effect of the law, but have effect as if they had been made by an Act commencing on the republication date (see *Legislation Act 2001*, s 115 and s 117). The changes are made if the Parliamentary Counsel considers they are desirable to bring the law into line, or more closely into line, with current legislative drafting practice.

This republication includes amendments made under part 11.3 (see endnote 1).

Uncommenced provisions and amendments

If a provision of the republished law has not commenced, the symbol **U** appears immediately before the provision heading. Any uncommenced amendments that affect this republished law are accessible on the ACT legislation register (www.legislation.act.gov.au). For more information, see the home page for this law on the register.

Modifications

If a provision of the republished law is affected by a current modification, the symbol **M** appears immediately before the provision heading. The text of the modifying provision appears in the endnotes. For the legal status of modifications, see the *Legislation Act 2001*, section 95.

Penalties

At the republication date, the value of a penalty unit for an offence against this law is \$160 for an individual and \$810 for a corporation (see *Legislation Act 2001*, s 133).

Water Resources Act 2007

An Act to provide for sustainable management of the water resources of the Territory, and for other purposes

Part 1 Preliminary

1 Name of Act

This Act is the *Water Resources Act 2007*.

3 Dictionary

The dictionary at the end of this Act is part of this Act.

Note 1 The dictionary at the end of this Act defines certain terms used in this Act, and includes references (*signpost definitions*) to other terms defined elsewhere in this Act.

For example, the signpost definition ‘*offence*, for part 10 (Enforcement)—see section 78.’ means that the term ‘offence’ is defined in that section for part 10.

Note 2 A definition in the dictionary (including a signpost definition) applies to the entire Act unless the definition, or another provision of the Act, provides otherwise or the contrary intention otherwise appears (see [Legislation Act](#), s 155 and s 156 (1)).

4 Notes

A note included in this Act is explanatory and is not part of this Act.

Note See the [Legislation Act](#), s 127 (1), (4) and (5) for the legal status of notes.

5 Offences against Act—application of Criminal Code etc

Other legislation applies in relation to offences against this Act.

Note 1 *Criminal Code*

The [Criminal Code](#), ch 2 applies to all offences against this Act (see Code, pt 2.1).

The chapter sets out the general principles of criminal responsibility (including burdens of proof and general defences), and defines terms used for offences to which the Code applies (eg *conduct*, *intention*, *recklessness* and *strict liability*).

Note 2 *Penalty units*

The [Legislation Act](#), s 133 deals with the meaning of offence penalties that are expressed in penalty units.

Part 2 Main principles and concepts

6 Objects of Act

The objects of this Act are—

- (a) to ensure that management and use of the water resources of the Territory sustain the physical, economic and social wellbeing of the people of the ACT while protecting the ecosystems that depend on those resources; and
- (b) to protect aquatic ecosystems and aquifers from damage and, where practicable, to reverse damage that has already happened; and
- (c) to ensure that the water resources are able to meet the reasonably foreseeable needs of future generations.

7 Territory rights to water

Subject to this Act, the right to the use, flow and control of all water of the Territory is vested in the Territory and is exercisable by the Minister on behalf of the Territory.

7A Application of Act to national land and Googong Dam Area

- (1) For this Act, the water resources of the Territory include—
 - (a) surface water and ground water on national land; and
 - (b) the surface water of the Googong Dam Area.

Note 1 Under the *Australian Capital Territory (Planning and Land Management) Act 1988* (Cwlth), the Territory is responsible for the management or regulation, or both, of the taking of water on national land (see that [Act](#), s 29 (1) (c)).

Note 2 Under the [Water Act 2007](#) (Cwlth), the surface water of the Googong Dam Area is to be treated as if it were in the ACT (see that [Act](#), s 63A) and the Territory is responsible for the water resource plan for that area (see that Act, s 22 (1) (Content of Basin Plan), table item 2 and div 2 (Water resource plans for particular water resource plan areas)).

(2) In this section:

Googong Dam Area—see the [Canberra Water Supply \(Googong Dam\) Act 1974](#) (Cwlth), section 3.

8 Surface water

For this Act, **surface water** means—

- (a) water on or flowing over land (including in a waterway) after having—
 - (i) fallen as rain or hail or precipitated in any other way; or
 - (ii) risen to the surface naturally from underground; or
 - (iii) been returned to the environment following treatment or use; and
- (b) water mentioned in paragraph (a) that has been collected in a dam, reservoir or rainwater tank.

9 Ground water

- (1) For this Act, **ground water** means water occurring or obtained from below the surface of the ground or beneath a waterway.
- (2) **Ground water** includes water occurring in or obtained or flowing from a bore.
- (3) However, **ground water** does not include water occurring in or obtained or flowing from any other system for the distribution, reticulation, transportation, storage or treatment of water or waste.

10 Waterway

- (1) For this Act, **waterway** means—
- (a) a river, creek, stream or other natural channel in which water flows (whether continuously or intermittently); or
 - (b) the stormwater system or any other channel formed (whether completely or partly) by altering or relocating a waterway mentioned in paragraph (a); or
 - (c) a lake, pond, lagoon or marsh (whether formed by geomorphic processes or by works) in which water collects (whether continuously or intermittently).
- (2) **Waterway** includes—
- (a) the bed that the water in the waterway normally flows over or is covered by; and
 - (b) the banks that the water in the waterway normally flows between or is contained by.
- (3) However, **waterway** does not include land normally not part of the waterway that may be covered from time to time by floodwaters from the waterway.
- (4) In this section:

stormwater means water run-off that is normally collected by a stormwater system.

stormwater system means a system of pipes, gutters, drains and channels that are public works constructed to collect or transport stormwater in or through an urban area.

11 Taking water

- (1) For this Act, **take** water includes—
- (a) in relation to surface water—

- (i) withdraw, pump, extract or use surface water; and
 - (ii) divert surface water for the purpose of using it; and
 - (iii) do anything else that results in a reduction of flow of surface water in a waterway; and
- (b) in relation to ground water—allow ground water to flow or be pumped from a bore.
- (2) However, a person does not **take** water if the person uses water taken by someone else under a licence to take water.

Example—s (2)

using water provided by a water utility

11A ACT water resource plan

- (1) The ACT water resource plan consists of the following:
 - (a) the environmental flow guidelines, if any;
 - (b) the determination of water management areas;
 - (c) the determination of the total amounts of surface water and ground water available for taking under section 17;
 - (d) guidelines determined under section 18, if any, for working out reasonable amounts of water for particular uses;
 - (e) anything else prescribed by regulation.
- (2) The ACT water resource plan may apply, adopt or incorporate an instrument as in force from time to time.
- (3) The [Legislation Act](#), section 47 (6) does not apply in relation to an instrument applied, adopted or incorporated as in force from time to time under this section.

Note An instrument applied, adopted or incorporated under this section does not need to be notified under the [Legislation Act](#) because s 47 (6) does not apply (see [Legislation Act](#), s 47 (7)).

Part 3 Environmental flow guidelines

12 Environmental flow guidelines

- (1) The Minister may approve guidelines (*environmental flow guidelines*) for working out the flow of water that is needed to maintain aquatic ecosystems.

Note Power to make a statutory instrument (including guidelines) includes power to amend or repeal the instrument (see [Legislation Act](#), s 46 (1)).

- (2) Environmental flow guidelines approved by the Minister are a disallowable instrument.

Note A disallowable instrument must be notified, and presented to the Legislative Assembly, under the [Legislation Act](#).

13 Environmental flow guidelines—preparation by director-general

- (1) Before the Minister approves environmental flow guidelines, the director-general must prepare draft environmental flow guidelines for the Minister's approval.
- (2) In preparing draft guidelines, the director-general—
 - (a) must consider principally the ecological needs of aquatic ecosystems; and
 - (b) may consider the environmental, economic and social impact of the guidelines.
- (3) The director-general must consult with the authority in preparing the draft guidelines.

14 Environmental flow guidelines—consultation

- (1) After preparing draft guidelines under section 13, the director-general must prepare a notice (a *consultation notice*)—
 - (a) containing a brief description of the draft guidelines; and

- (b) stating that copies of the draft guidelines are available for public inspection for a period (the **consultation period**) and at the place stated in the notice; and
 - (c) inviting people to give written comments about the draft guidelines to the director-general in the consultation period.
- (2) The consultation period must be at least 60 days.
- (3) The consultation notice is a notifiable instrument.

Note A notifiable instrument must be notified under the [Legislation Act](#).
- (4) The director-general must give additional public notice of the consultation notice.

Note **Public notice** means notice on an ACT government website or in a daily newspaper circulating in the ACT (see [Legislation Act](#), dict, pt 1). The requirement in s (4) is in addition to the requirement for notification on the legislation register as a notifiable instrument.
- (5) The director-general must consider any written comments received in the consultation period and may revise the draft guidelines in accordance with the comments as the director-general considers appropriate.
- (6) This section does not apply to a draft amendment of the environmental flow guidelines that is to make formal changes only.

15 Environmental flow guidelines—submission to Minister

- (1) The director-general must submit the draft guidelines (including any revision under section 14 (5)) to the Minister for approval, together with a written report—
 - (a) about the director-general’s consultation with the public and with any particular person or entity about the draft guidelines; and
 - (b) setting out the issues raised in the comments given to the director-general under section 14 in the consultation period.

- (2) On receiving draft guidelines submitted for approval, the Minister may—
 - (a) approve the guidelines as submitted; or
 - (b) refer the draft back to the director-general with a written direction to do 1 or more of the following:
 - (i) conduct further stated consultation;
 - (ii) consider any revision suggested by the Minister;
 - (iii) revise the draft in a stated way.
- (3) If the Minister refers draft guidelines back to the director-general under subsection (2) (b), the director-general must—
 - (a) comply with the Minister’s directions; and
 - (b) resubmit the draft guidelines (with any revisions required) to the Minister for approval together with a written report about the director-general’s compliance with the Minister’s directions and about any revision of the draft guidelines.
- (4) Subsection (2) applies to draft guidelines resubmitted to the Minister for approval.

Part 3A Environmental values

15A Environmental values for waterways

- (1) The Minister must determine environmental values for waterways in the ACT.
- (2) A determination is a notifiable instrument.

Part 4 Water access entitlements

16 Water management areas

- (1) The Minister must determine areas (*water management areas*) for managing the water resources of the Territory.
- (2) A determination is a disallowable instrument.

Note A disallowable instrument must be notified, and presented to the Legislative Assembly, under the [Legislation Act](#).

17 Amounts of water available from areas

- (1) The Minister must determine—
 - (a) the total amount of surface water that is available for taking in each water management area; and
 - (b) the total amount of ground water that is available for taking in each water management area.
- (2) The amounts must be determined taking into account—
 - (a) the environmental flow guidelines; and
 - (b) the total water resources of the Territory; and
 - (c) any assessment undertaken by the director-general to establish sustainable yields for the water management area.
- (3) However, the amount determined must not be more than—
 - (a) for subsection (1) (a)—the SDL for surface water; and
 - (b) for subsection (1) (b)—the SDL for ground water.
- (4) The Minister may also determine, for any water management area, an amount of the water determined under subsection (1) that is to be reserved for future use.

- (5) If the Minister makes a determination reducing the amount of water reserved for future use under subsection (4), the determination may state the reason for the reduction.

- (6) A determination under this section is a disallowable instrument.

Note A disallowable instrument must be notified, and presented to the Legislative Assembly, under the [Legislation Act](#).

- (7) In this section:

Basin Plan means the Basin Plan made under the [Water Act 2007](#) (Cwlth), section 44 (3) (b) (i).

SDL for ground water means the long-term average sustainable diversion limit for ground water for the ACT set out in the Basin Plan.

SDL for surface water means the long-term average sustainable diversion limit for surface water for the ACT set out in the Basin Plan.

18 Amounts of water reasonable for uses

- (1) The Minister may determine guidelines for working out the amounts of water that are reasonable amounts for particular uses.

Note Decisions about granting water access entitlements and issuing licences to take water require consideration of what are reasonable amounts for intended uses (see s 21 (2) (a) (ii) and s 30 (2) (c)).

- (2) A determination is a disallowable instrument.

Note A disallowable instrument must be notified, and presented to the Legislative Assembly, under the [Legislation Act](#).

19 Water access entitlements

- (1) A ***water access entitlement*** is an entitlement to the amount of surface water or ground water stated in the entitlement.

(2) The amount must be stated as the lesser of—

- (a) a percentage of the total amount of the surface water or ground water available for taking from time to time in the water management area stated in the entitlement; and
- (b) a stated maximum volume.

Note Because a water access entitlement entitles the holder to a percentage of the water available for taking, and that amount is likely to vary from time to time, the entitlement does not guarantee that a particular volume of water, or any water, will be available under the entitlement.

20 Water access entitlement—application

(1) A person may apply to the Minister for a water access entitlement.

Note A fee may be determined under s 107 for this provision.

(2) The application must be in writing and must state—

- (a) the applicant's name; and
- (b) whether the applicant seeks surface water or ground water; and
- (c) the amount of water sought; and
- (d) the water management area to which the amount relates; and
- (e) the intended use of the water; and
- (f) the place where the applicant intends to access the water and the basis of the applicant's right to have access to that place.

(3) The Minister may, by written notice given to the applicant, require the applicant to give the Minister additional information or documents the Minister reasonably needs to decide the application.

(4) If the applicant does not comply with a requirement under subsection (3), the Minister may refuse to consider the application further.

21 Water access entitlement—decision on application

- (1) On application by a person for a water access entitlement, the Minister must—
- (a) grant the water access entitlement; or
 - (b) refuse to grant the water access entitlement.
- (2) The Minister must not grant the water access entitlement unless satisfied that—
- (a) the amount of water to which the entitlement would give access—
 - (i) is available for taking having regard to any determination in force under section 17 (Amounts of water available from areas) and any other water access entitlements and surviving allocations that exist in relation to the water management area; and
 - (ii) is not more than a reasonable amount for the intended use having regard to any determination in force under section 18 (Amounts of water reasonable for uses); and
 - (b) the water is not intended to be used on urban residential property; and
 - (c) the intended use of the water is otherwise consistent with the territory plan; and
 - (d) the applicant does not hold a surviving allocation; and
- Note* Surviving allocations are water allocations that were granted under the repealed Act. A person holding a surviving allocation may surrender it, and be granted a water access entitlement, under this Act, pt 13 (Surviving allocations).
- (e) it is appropriate to grant the entitlement having regard to—
- (i) the applicant's environmental record; and
 - (ii) anything else the Minister considers relevant.

- (3) Subsection (2) (b) does not apply if the applicant is a water utility.
- (4) In deciding applications, the Minister must give priority—
 - (a) first, to any application for surface water by the owner or occupier of land who—
 - (i) was previously able to take water without a licence because the water was taken from a waterway on or immediately adjacent to the land; and
 - (ii) can no longer do so because a boundary change was made to the land, on the Territory's initiative, after the commencement of this Act; and
 - (iii) is seeking the water for stock or domestic use; and
 - (b) second, to any application by a person who does not have access to urban water supply and is seeking the water for stock or domestic use; and
 - (c) after that, as the Minister considers appropriate.

22 Water access entitlement—content

A water access entitlement must state—

- (a) the name of the holder of the entitlement; and
- (b) the amount of surface water or ground water that may be taken; and
 - Note* The amount must be stated as the lesser of a percentage of the total amount of water available for taking in the water management area and a stated maximum volume (see s 19 (2)).
- (c) the water management area to which the amount relates; and
- (d) if the holder does not have access to urban water supply and the entitlement is for water for stock or domestic use—
 - (i) that the water is for stock or domestic use; and

- (ii) the place where the water may be taken; and
- (e) anything else required under this Act to be stated in the water access entitlement.

Note A reference to an Act includes a reference to the statutory instruments made or in force under the Act, including any regulation (see [Legislation Act](#), s 104).

23 Water access entitlement—conditions

- (1) A water access entitlement is subject to any condition—
 - (a) imposed when the entitlement is granted; or
 - (b) prescribed by regulation; or
 - (c) imposed on amendment of the entitlement under section 24.

Examples of conditions to which water access entitlement may be subject

- 1 that the water may be used only for the purpose stated in the entitlement
 - 2 that the water may be used only in a water management area
 - 3 that the water may be taken only from the place stated in the entitlement
 - 4 for an entitlement to ground water granted to enable a bore to be drilled—that the entitlement will expire at the end of 12 months after the entitlement is granted if ground water is not found in that period
- (2) The conditions to which a water access entitlement is subject are taken to be conditions of any licence to take water that is based on the entitlement.

24 Water access entitlement—amendment

- (1) The authority may amend a water access entitlement, including by imposing a condition on, or amending an existing condition of, the entitlement.

Note A fee may be determined under s 107 for this provision.

- (2) However, the authority may amend an entitlement only if—
- (a) the authority has given the holder of the entitlement written notice of the proposed amendment; and
 - (b) the notice states that written comments on the proposal may be made to the authority before the end of a stated period of at least 14 days after the day the notice is given to the holder; and
 - (c) the authority has considered any comments made before the end of the stated period.
- (3) Subsection (2) does not apply if the holder applied for, or agreed in writing to, the proposed amendment.
- (4) The amendment of an entitlement takes effect on—
- (a) the date on which notice of the amendment is given to the holder; or
 - (b) if a later date is stated in the notice—that date.
