

AUSTRALIAN CAPITAL TERRITORY
MOTOR VEHICLES (DIMENSIONS AND MASS) ACT 1990

DETERMINATION
No. 85 of 1990

Under Section 57(2) of the Motor Vehicles (Dimensions and Mass) Act 1990, I DETERMINE that for the purposes of Section 24(1)(c) of the Act the gross mass in tonnes for each class of vehicles "D" is $3L + .8$, where L equals the overall axle spacing in metres.

For the purposes of this Determination "overall axle spacing" means the distance between the centre line of the most forward axle or, if the most forward axle forms part of a twin steer axle group, the forward axle of that group and the centre line of the most rearward axle or, if the most rearward axle forms part of an axle group, the most rearward axle of that axle group, being that distance measured while the centre line of the most forward axle or twin steer axle of the vehicle is parallel to the centre line of the most rearward axle or most rearward axle of the rear axle group of the vehicle.

Date: 24 DEC 1990
