

Australian Capital Territory

Public Place Names Street Nomenclature 2001, No. 24

Disallowable Instrument No. 337 of 2001

made under the

Public Place Names Act 1989, section 4 (Minister to determine names)

I revoke Instrument No. DI2001-322 notified in the ACT Legislation Register on 11 October 2001 and determine the street names specified in the attached Schedule and associated plan.

Dated the 30th day of November 2001

LINCOLN JAMES HAWKINS
Delegate of the Minister

SCHEDULE

STREET NOMENCLATURE

Division of Banks: Botanists, things Botanical or relating to natural history.

NAME	ORIGIN	SIGNIFICANCE
Angell Place	Dr Herbert Angell OBE 1893-1992	A notable Australian scientist. As head of the CSIRO's plant Pathology Section Dr Angell's most outstanding success was the discovery of how to effectively control blue mould of tobacco, a disease which threatened the viability of the tobacco industry. He was awarded an OBE in recognition of this work.
Kettlewell Crescent	Mrs Agnes Louisa Kettlewell 1866-1936	An Australian botanist Mrs Kettlewell was associated with the formation of the Wattle Day League on 30 August 1909 and for some years thereafter was an official of the League. The species <i>Acacia kettlewelliae</i> Maiden was named after her.
Milligan Street	Joseph Milligan (1807-1883)	A naturalist and surgeon. Between 1829-42 he was surgeon of the Van Diemen's Land Company (a company which was established to promote the wool industry). Joseph Milligan visited all parts of the island making many botanical discoveries. He was one of the Founders of Royal Society Tasmania, Secretary 1844-1860. He has several plant species named after him.
Orange Thorn Crescent	<i>Citriobatus pauciflorus</i> (Orange Thorn)	Australian native shrub. 1-3 metres tall. The edible fruits are round in shape and yellow in colour, 1-3cm across, with a leathery skin and large seeds. The plants' spines (leaves) protect small birds. Found in NSW and Qld.

SCHEDULE

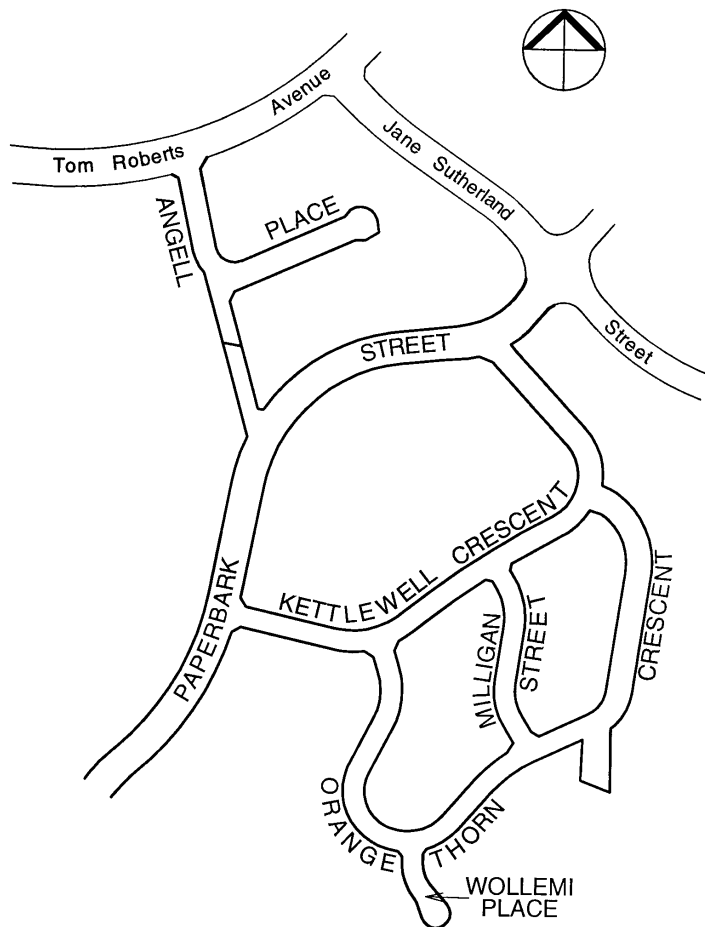

STREET NOMENCLATURE

Division of Banks: Botanists, things Botanical or relating to natural history.

NAME	ORIGIN	SIGNIFICANCE
Paperbark Street	<i>Melaleuca cajuputi</i> (Paperbark Tea-Tree)	<p>An Australian native tree naturally occurring in the Northern Territory, northern Queensland and northern Western Australia.</p> <p>A medium-sized tree to about 25 metres tall with a single stem. The bark is layered and papery. The crown has a silvery appearance. The leaves are straight or curved and often hairy.</p>
Wollemi Place	<i>Wollemia nobilis</i> (Wollemi Pine)	<p>The Wollemi Pine is a 'living fossil', first discovered in 1994 by David Noble.</p> <p>A conifer that grows to a height of 35 metres with a trunk diameter of over one metre. The leaves vary from bright lime-green when young to yellow-green as they mature. Its bark is particularly unusual, and looks like bubbling chocolate.</p> <p>Its discovery was particularly significant as it belongs to a new genus of plants previously known only as fossils that date back to the age of dinosaurs, some 150 million years ago.</p> <p>It is one of the world's rarest species with only 43 adult trees known in three small stands in the Wollemi National Park, west of Sydney, Australia.</p>
