

Australian Capital Territory

# Public Place Names (Harrison) Determination 2004 (No 1)

Disallowable Instrument DI2004-79

Made under the

***Public Place Names Act 1989***— section 3 (Minister to determine names)

---

I DETERMINE the names of the public places that are Territory Land as specified in the attached Schedule and as indicated on the associated plans.

Neil Savery  
Delegate of the Minister  
3 June 2004

## SCHEDULE

### Public Place Names (Harrison) Determination 2004 (No 1)

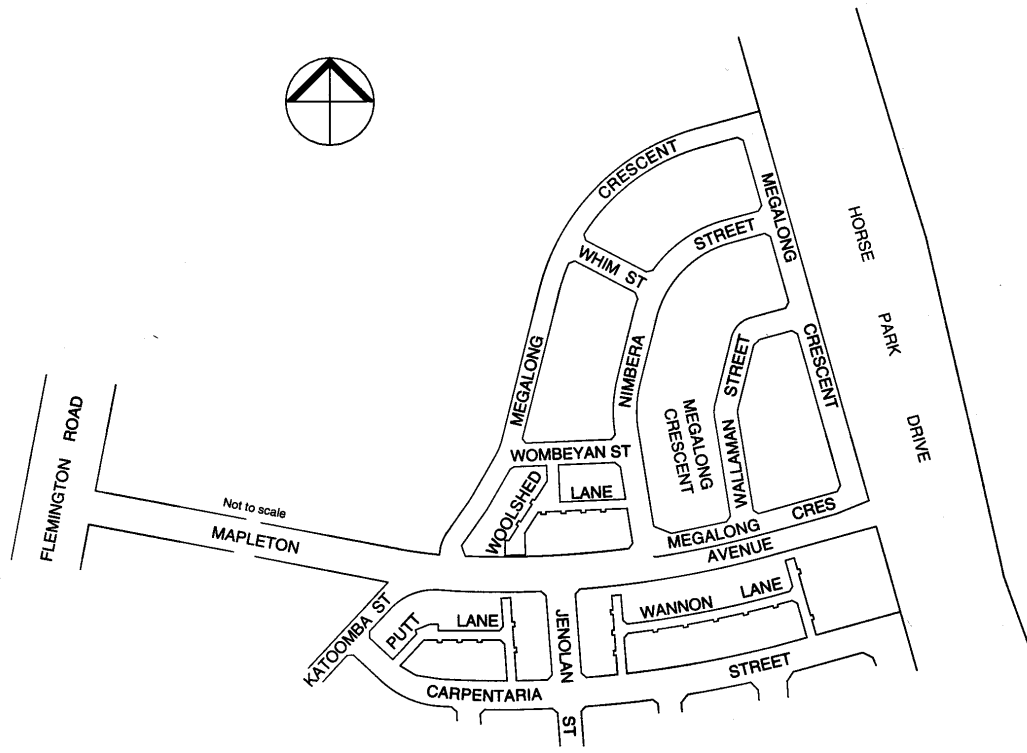

<b>NAME</b>	<b>ORIGIN</b>	<b>SIGNIFICANCE</b>
Adder Street	Adder Bay, New South Wales	Natural Feature  Adder Bay is an indentation in the eastern shoreline of the northern branch of Conjola Lake opposite Long Point. It is about 1km west north west of Conjola Hill in the Parish of Conjola in the County of St Vincent.
Andruco Street	Andruco Lagoon, New South Wales	Natural Feature  Andruco Lagoon is a billabong on the Darling River in the county of Wentworth.
Angora Street	Angora Gorge, New South Wales	Natural Feature  Angora Gorge is on Jack Halls Creek above the Kamilaroi Waterholes about 2.5km east-south-east of Westons Mountain, in the Parish of Timor in the County of Gowen.
Burbie Street	Burbie Canyon, New South Wales	Natural Feature  Burbie Canyon is situated in the Parish of Caraghnan in the County of Gowen, NSW. It is a canyon through which Burbie Creek flows, about 4 km north-east by north of Mount Exmouth.
Carpentaria Street	Gulf of Carpentaria, Northern Territory / Queensland	Natural Feature  The Gulf of Carpentaria is the longest and widest indentation in Australia's north coast.  The Gulf of Carpentaria was named by the Dutch explorer Jan Cartensz in 1623 after the then Governor-General of the Dutch East Indies (now Indonesia), Pieter de Carpentier.

Cape York Street	Cape York Peninsula, Queensland	Natural Feature Cape York Peninsula is located in the north-eastern corner of Australia, starting a south of Cairns and extending about 750 km to its tip in the north. It covers about 207,000 square kilometres. The Coral Sea is to the east of the Peninsula, the Torres Strait to the north, and the Gulf of Carpentaria to the west.
Coomera Street	Coomera Falls, Queensland	Natural Feature Coomera Falls are situated within the Lamington National Park in southern Queensland. They have a drop of 64 metres.
Cultivation Street	Cultivation Creek Falls, Victoria	Natural Feature Cultivation Creek Falls are in the Grampians some 25 kilometres west of Halls Gap.
Cudgewa Lane	Cudgewa Falls, Victoria	Natural Feature Cudgewa Falls are also known as Cudgewa Bluff Falls. These falls are on Cudgewa Creek, in the Burrowa-Pine Mountain National Park, 7 kilometres north of Cudgewa and 80 kilometres east of Albury.
Dimby Street	Dimby Plains, New South Wales	Natural Feature Dimby Plains is situated in the Parish of Kickerbell in the County of Pottinger. It is about 8 km west by south of Mooki Hills and about 11 km north-east of Yarraman.
Drummer Street	Drummer Falls, Victoria	Natural Feature Drummer Falls are on the Mackenzie River in the Grampians. They were allegedly so named because of the drumming sound they make as they crash over the rocks into the pool below.
Ebor Lane	Ebor Falls, New South Wales	Natural Feature Ebor Falls are situated in north-eastern New South Wales. They drop a total of 152 metres in a series of three horseshoe-shaped tiers.

Elabana Street	Elabana Falls, Queensland	Natural Feature Elabana Falls are situated on the Albert River in south Queensland. They have a drop of 18 metres.
Encounter Street	Encounter Bay, South Australia	Encounter Bay is an inlet to the west of Goolwa. Victor Harbour is within the Bay. Matthew Flinders named the bay in 1802 after he unexpectedly encountered the French explorer Nicolas Baudin there.
Eurobin Street	Eurobin Falls, Victoria	Natural Feature Eurobin Falls are a kilometre off the main road leading up Mount Buffalo. There is an upper and a lower fall, each tumbling down an enormous granite rock-face which has been smoothed by the waters and semi-bleached by their salts.
Granites Street	The Granites, Northern Territory	Natural Feature The Granites are a series of bare rocks in the south-west of the Tanami Desert.
Howmans Street	Howmans Falls, Victoria	Natural Feature Howmans Falls are the highest above sea level of all the waterfalls in Victoria. They are at about 1620 metres and are on Camp Creek, 300 metres below and 4 kilometres south-east of the summit of Victoria's highest mountain, Mount Bogong in Victoria's north-eastern alpine country.
Jenolan Street	Jenolan Caves, New South Wales	Natural Feature The Jenolan Caves are a series of limestone caves, 11 of which have been named. Extensive Limestone Caves on the Jenolan River where it goes underground for about 0.4 km. They are about 20 km south east of Oberon.
Katoomba Street	Katoomba Falls, New South Wales	Natural Feature Katoomba Falls are situated in the Blue Mountains on the Kedumba River at the head of Kedumba Valley about 800m North-west of Echo Point in New South Wales. They have a drop of 164 metres.

Keppel Street	Keppel Bay, Queensland	Natural Feature Keppel Bay is a large bay at the mouth of the Fitzroy River. James Cook named the bay in 1770 in honour of Augustus Keppel, a naval commander. Keppel Bay is sheltered on the east by Curtis Island and to the north is the Keppel Islands group.
Kopi Lane	Kopi Plain, New South Wales	Natural Feature Kopi Plain is situated in the County of Tara. It is about 19 kilometres west by north of Pine Lake and about 24 kilometres south by east of White Lake.
Mapleton Avenue	Mapleton Falls, Queensland	Natural Feature Mapleton Falls are situated on the west side of Blackall Range, south Queensland. They have a drop of 73 metres.
Megalong Crescent	Megalong Valley, New South Wales	Natural Feature Megalong Valley is a valley in the city of Blue Mountains to the south of Katoomba.
Nimbera Street	Nimbera Plain, New South Wales	Natural Feature Nimbera Plain is situated in the Parish of Culgoa. It is a plain about 10 km south-south-west of Jobs Gate and about 25 km north-west of Weilmoringle.
Nullarbor Avenue	Nullarbor Plain, Western Australia and South Australia	Natural Feature Nullarbor Plain is an arid limestone plateau, almost treeless, to the north of the Great Australian Bight.
Phantom Street	Phantom Falls, Victoria	Natural Feature Phantom Falls are on the St. George River downstream from the Allen Dam about three kilometres south-west of Lorne, Victoria. They are some 15 metres tall with an almost sheer drop.
Putt Lane	Putt Flat, New South Wales	Natural Features Putt Flat is situated in the Parish of Ettrema in the County of St. Vincent. It is the area of land to the north of Putt Hill at the head of Cabbage Tree Creek 1.6 km south of Ettrema Trigonometrical Station.

Tanami Street	Tanami Desert, Northern Territory	Natural Feature  The Tanami Desert is a desert and wildlife sanctuary to the west of Tennant Creek. It consists mostly of spinifex and sand plains, and is roughly bounded on the east by the Stuart Highway.
Wallaman Street	Wallaman Falls, Queensland.	Natural Feature  The Wallaman Falls are west of Ingham, high in the Seaview Range, Queensland. Accumulated waters surge along Stony Creek to abruptly plunge more than 300 metres down a sheer cliff, creating Australia's tallest waterfall.
Whim Street	Whim Plain, New South Wales	Natural Feature  Whim Plain is situated in the County of Irrara. It is a claypan which lies west of Whim Wall and 14 kilometres west-north-west of Brindigabba
Wombeyan Street	Wombeyan Caves, New South Wales	Natural Feature  The Wombeyan Caves are a series of caves in the southern highlands about 68 kilometres north-west of Mittagong, New South Wales.
Wannon Lane	Wannon Falls, Victoria	Natural Feature  Wannon Falls are on the Wannon River which rises in the Grampians in Victoria's Western District and meets the Glenelg River near Casterton. They are 19 kilometres north-west of Hamilton on the Coleraine Road (the Glenelg Highway) close beside the road in the Wallon Falls Highway Park.
Woolshed Lane	Woolshed Falls, Victoria	Natural Feature  Woolshed Falls are about 6 kilometres north of Beechworth in north-eastern Victoria.  The massive granite rock-face over which the waters tumble has been bleached over the ages by the chemicals in the water and provides a colourful backdrop to the frothing waters.

Joins Plan 2
