

Utilities (Technical Regulation) Listed Dams Determination 2019

Disallowable instrument DI2019–205

made under the

Utilities (Technical Regulation) Act 2014, s 69 (Listing of certain dams)

1 Name of instrument

This instrument is the *Utilities (Technical Regulation) Listed Dams Determination 2019*.

2 Commencement

This instrument commences on the day after its notification day.

3 Determination of listed dams

I determine the list of dams that present a risk of significant adverse effects on the community in the event of the failure of the dam as set out in schedule 1.

Note 1 The risk of adverse effects in the case of failure is NOT at all related to the risk of failure. A dam with an associated high risk of adverse impacts in the case of failure can be, and usually is, a safe dam; that is, its risk of failure is very low.

Note 2 The dams register is available on the [Access Canberra website](#).

4 Revocation

The *Utilities (Technical Regulation) (Listed Dams) Determination 2018* (DI2018–234) is revoked.
