# Introduction

## Name

The name of this code is **Greenway Precinct Code**.

## Application

The code applies to the Division of Greenway.

## Purpose

This code provides additional planning, design and environmental controls for specific areas or blocks and may also contain references to provisions in other codes.

In conjunction with other relevant codes it will be used by the *Authority* to assess development applications and offer guidance to intending applicants in designing development proposals and preparing development applications.

## Structure

This code contains additional rules and/or criteria for particular blocks or parcels identified as areas RCn on the precinct map, to be read in conjunction with the relevant development code. It may also contain sub-parts.

Each element has one or more rules and, unless the respective rule is mandatory, each rule has an associated criterion. Rules provide quantitative, or definitive, controls. By contrast, criteria are chiefly qualitative in nature.

In some instances rules are mandatory. Such rules are accompanied by the words “This is a mandatory requirement. There is no applicable criterion.” Non-compliance with a mandatory rule will result in the refusal of the development application. Conversely, the words “There is no applicable rule” is found where a criterion only is applicable.

## Code hierarchy

Under the *Planning and Development Act 2007*, where more than one type of code applies to a development, the order of precedence if there is inconsistency of provisions between codes is: precinct code, development code and general code.

If more than one precinct code applies to the site, the most recent precinct code takes precedence to the extent of any inconsistency.

## Definitions

Defined terms, references to legislation and other documents are italicised.

Definitions of terms used in this code are listed in part 13 of the Territory Plan or, for terms applicable only to this code, associated with the respective rule.

## RC3 – Tuggeranong Town Centre

This part applies to blocks and parcels identified in area RC3 shown on the Greenway Precinct Map. RC3 includes the Tuggeranong Town Centre.

### Desired Character

#### Settlement Pattern

The Tuggeranong town centre has a strong urban edge whilst maintaining extensive physical and visual connections to the surrounding landscape including the mountains, open space, the river corridor and the lake.

The town centre enjoys a high level of connectedness through a fine grain grid pattern network of roads and pedestrian and cycle thoroughfares.

There is a network of high quality open spaces throughout the urban area of the town centre with links to the lake foreshore, community gardens and other public spaces.

#### Land use

A substantial component of the town centre is given over to residential development, with a focus on a mix of retail, commercial and other activating uses primarily at ground level and on key frontages.

#### Built form

There is a modern approach to the pitched red roofs and cream buildings, with a variety of roof forms including roof gardens, flat and skillion roofs.

#### Precincts

The foreshore area including Anketell Street has the following character:

- Development that embraces the lake through physical and visual connections to the foreshore
- Development that provides vibrancy through activity at the street level and finer grain shop fronts along major pedestrian areas
- Development that provides a pedestrian friendly environment
- Built form that steps down toward the foreshore.

The area along Athllon Drive has the following character:

- Taller building elements to match the taller building elements fronting the lake shore.
- Office buildings which address Athllon Drive to create a continuous building line, without excessive blank walls.
- Framing of the views north along Athllon Drive to distant hills
- A mix of residential uses on the western side of Athllon Drive, located to maximize views of the mountains to the west and access to employment and services in the town centre
- Pedestrian links to the town centre.

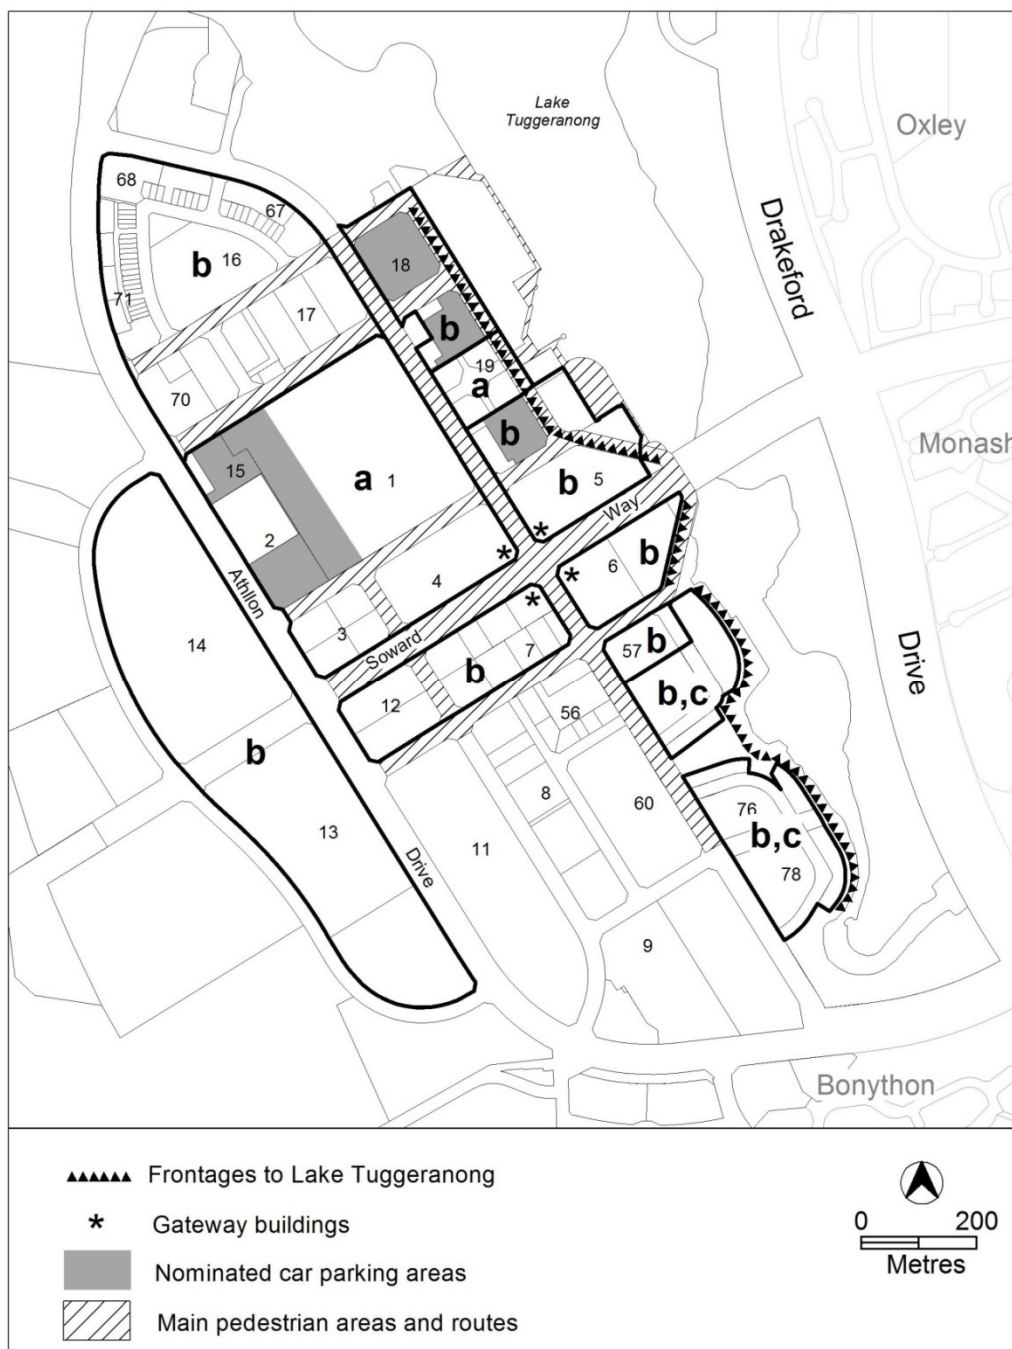

The Soward Way area has the following character:

- Taller building elements to create a pedestrian friendly boulevard on Soward Way
- Development frames the views to the mountains to the west
- Development provides a mix of uses with retail at ground level.
