# Introduction

## Name

The name of this code is **Single Dwelling Housing Development Code**.

## Application

This code applies to *single dwelling housing* in all zones

## National Capital Plan

Where a development is subject to special requirements under the National Capital Plan, or any relevant development control plan prepared under the National Capital Plan, the development must not be inconsistent with the special requirements or development control plan. Where any provision of this code is inconsistent with special requirements under the National Capital Plan, or any relevant development control plan prepared under the National Capital Plan, that provision has no effect.

## Purpose

This code provides additional planning, design and environmental controls to support the objectives of the relevant zone.

It will be used by the *Authority* to assess development applications. It also offers guidance to applicants in designing development proposals and preparing development applications.

## Structure

This code has a number of elements. Each element has one or more rules, and each rule has an associated criterion (unless the rule is mandatory). Rules provide quantitative, or definitive, controls. By contrast, criteria are chiefly qualitative in nature.

In some instances rules are mandatory. Such rules are accompanied by the words “This is a mandatory requirement. There is no applicable criterion.” Non-compliance with a mandatory rule will result in the refusal of the development application. Conversely, the words “There is no applicable rule” is found where a criterion only is applicable.

## Assessment tracks

Assessment tracks for particular developments are specified in the relevant zone development table.

Proposals in the **code track** must comply with all rules relevant to the development.

Proposals in the **merit track** and **impact track** must comply with a rule or its associated criterion, unless the rule is mandatory (ie. it has no related criterion). Where a rule is fully met, no reference to the related criterion needs to be made. Where there is a departure from a rule, or where a criterion only applies, the onus is on the applicant to demonstrate that the relevant criterion is satisfied, through supporting drawings and/or written documentation. In addition, the applicant for proposals in the impact track must justify any non-compliance by reference to the Statement of Strategic Directions.

## Code hierarchy

Under the *Planning and Development Act 2007*, where more than one type of code applies to a development and there is inconsistency between provisions, the order of precedence is: precinct code, development code, and general code.

## Related codes

### *Residential Zones Development Code*

Applies to all forms of development in residential zones and makes reference to development codes and general codes that may also apply.

### *Precinct codes*

Precinct codes may contain additional provisions that apply to specified *blocks*. Precinct codes are found in part 10.

### *Development codes*

The following general codes, in particular, may be relevant.

- Access and Mobility General Code
- Crime Prevention through Environmental Design General Code
- Home Business General Code
- Parking and Vehicular Access General Code
- Planning for Bushfire Risk Management General Code
- Residential Boundary Fences General Code
- Water Ways: Water Sensitive Urban Design General Code

General codes are found in part 11 of the Territory Plan.

Development must comply with the relevant codes (including other general codes that may not be listed above), subject to the code hierarchy outlined in the introduction to this code.

## Definitions

Defined terms, references to legislation and other documents are italicised.

Definitions of terms used in this code are listed in part 13 of the Territory Plan or, for terms applicable only to this code, are associated with the respective rule or listed below.

*Deep soil zone*: an area of soil within a *development* that is unimpeded by *buildings* or *structures* above and below ground, and which has adequate dimensions to allow for the growth of healthy trees. Deep soil zones exclude *basements*, services, swimming pools, tennis courts and impervious surfaces including car parks, driveways, podium and roof areas.

- a) is proportionate to the size of the dwelling
- b) capable of enabling an extension of the function of the dwelling for relaxation, dining, entertainment, recreation, and it is directly accessible from the dwelling
- c) accommodates service functions such as clothes drying and domestic storage
- d) is screened from public streets and public open space with pedestrian or cycle paths
- e) reasonable access to sunlight to enable year round use
