# Public Health Emergency Direction

## *Public Health Act 1997*

*Made under the Public Health Act 1997,  
section 120 (Emergency actions and directions)*

I, Dr Kerryn Coleman, Chief Health Officer, consider it necessary or desirable to alleviate the declared emergency to give the directions as set out below.

### **Grounds for directions**

I consider the directions are necessary or desirable to alleviate the **COVID-19** emergency on the grounds that—

- (a) **COVID-19** poses a serious public health risk to the Australian Capital Territory community;
- (b) the Australian Capital Territory has experienced persistent community transmission since the outbreak of the Delta variant of **COVID-19**, in the Australian Capital Territory on 12 August 2021;
- (c) Other Australian States and Territories are continuing to experience persistent community transmission of the Delta variant of **COVID-19**, also posing a significant risk for the Australian Capital Territory in view of travel across the jurisdictions.
- (d) the Delta variant of **COVID-19** (labelled as a variant of concern) has proven challenging both nationally and internationally, demonstrating that elimination of the virus is not feasible and community transmission will continue as the Australian Capital Territory seeks to mitigate the impact of this public health risk;
- (e) it is important to limit the spread of **COVID-19** in the Australian Capital Territory community.

In making this Direction, I have had regard to relevant human rights and I am satisfied that the limitations imposed as a result of this Direction are both demonstrably justifiable in a free and democratic society.

- Access education and training to recognise COVID-19 symptoms and follow relevant protocols if symptoms occur
- Access daily risk communication related to declared Commonwealth hotspots, jurisdictional lockdowns and required control measures;
