THE FIFTH SCHEDULE.

MOTOR VEHICLES.

Conditions to be complied with before a Motor Vehicle is registered.

1. Particulars on application form shall be filled in by applicant.
2. The motor vehicle shall be produced at any time and place appointed by the Commission.
3. The motor vehicle shall be capable of being so worked that it may travel either backwards or forwards and be capable of being readily steered.
4. The steering arms and connexions shall be of sufficient length and as far as possible protected from damage by collision.
5. All brake and steerage connexions shall be secured by bolts, the bolts shall be fitted with nuts, and the nuts shall be locked or pinned.
6. The motor vehicle shall have two independent brakes in good working order of sufficient strength so that either of them shall be capable of stopping and holding the vehicle under all conditions, and of such efficiency that the application of either shall cause two wheels upon the same axle to be effectually prevented from revolving, or shall have the same effect in stopping the vehicle as if those wheels were so held. Each brake shall be as far as possible so affixed as to be capable of easy adjustment and at least one must be made so as to be applied by the foot of the driver.
No two brakes which operate upon the same part will be considered as independent, and at least one should act upon the road wheels without any connexion with the propelling gears.
Notwithstanding anything contained in this clause, no motor vehicle to which "Moore Transmission Gears" are attached shall be registered unless a "Moore Transmission Brake" is also properly attached to that motor vehicle.
7. Clauses 3 to 6 (both inclusive) of this Schedule shall not apply to motor cycles. In the case of a motor cycle one effective brake capable of stopping and holding the cycle shall be deemed sufficient.
8. All fittings shall be in such condition as not to be likely to cause annoyance, by bad smell or otherwise, or danger to any person upon the motor vehicle or upon a public street.
9. The lubrication of the engine and the carburation of the working mixture shall be so controlled that smoke is not projected with the exhaust, or from any other part.
10. A lamp shall be suitably affixed to the offside or front of the motor vehicle, one other lamp shall be affixed on the off side of the rear of the motor vehicle and shall be so affixed as to reflect upon the rear number-plate, and so that it cannot be lit or extinguished by any person while in or upon the motor vehicle.
11. A suitable attachment shall be securely fastened in an approved position at the front and also at the rear of the motor vehicle, of a size satisfactory to the Commission, for the purpose of affixing the number-plates, and a lamp bracket shall be affixed at the rear of the motor vehicle to hold the rear lamp in such position as to reflect upon the rear number-plate.
The lamp-bracket shall be so affixed as not to obscure any portion of the rear number-plate.
12. An approved bell or alarm, or other means of giving due warning of the approach of the motor vehicle, shall be attached to the motor vehicle in a convenient position.
13. The motor vehicle shall not exceed 8 feet in width, measured between its extreme projecting points.
14. The motor vehicle shall have an efficient silencer so made and affixed that the exhaust shall be projected through the silencer.
15. A side-car shall not be affixed upon the right-hand side of any motor cycle.
16. (a) In each application for registration of a motor vehicle the weight unladen, and the width and material of the tyres, when other than rubber tyres, shall be stated.
